She's a cuddly flesh tinted rubber 11-inch baby that you can bathe . . . then, when she's sweet and clean, dry her gently and with as much care as your mommy dries you, powder her with fragrant talcum and she's ready to get dressed to go "bye-bye." Or, if time for her nap, you can dress her in her warm little shirt and clean diaper and put her to bed. Her thick lashes shadow her big glass-like eyes as they close sleepily . . . See her tiny turned-up nose, her rosy parted lips, her molded composition baby ringlets.

Her head, which turns and tilts from side to side, is made entirely of plastic. Of course, you'll want to treat her gently and kindly so that she'll be with you for many years, but she's a dolly that won't get hurt very easily. She'll be as good as new for a long time. She comes outfitted with a cotton shirt, diaper, and a real glass bottle with nipple.

Electric uncoupling between tender and first car
Track with built-in uncoupling unit—uncouples all cars

Big saving on Electric Freighter

$9.39

- Realistic steam type steel locomotive
- Remote control—reversing—slow—fast or stop at will
- Remote control uncoupling between tender and first freight car. Simply press button on control panel
- 38-inch 5-unit freighter famous Lionel quality

Lionel "027" 5-unit electric freight set. Young railroaders know that Lionel means quality in electric trains—that Lionel trains are leaders in modern design and up-to-the-minute improvements—that Lionel is built to run the Main Line, to make the fast schedule, to stand the long haul.

This set is 38 inches from locomotive to caboose. The electric locomotive looks like a big steam-type engine. It goes slow or fast, stops and starts, goes ahead or backs up—all by remote control; you can make it do all these things without touching the train—simply work lever on transformer. And you can uncouple the first car from the tender, too—without touching the train! Here's what you do: let the train stop on or travel over the special uncoupling section of the track; press button on control panel—and the first car "unhooks" from the tender. Tender has special magnetic coupler that does the work. And it couples again automatically, too.

Locomotive, tender, oil car, box car and caboose are all made of metal, and are colored to look like big Main Line trains. Locomotive has headlight that shines. Track is about 116 inches around—designed realistically to look like a real main-line railroad track. Underwriters' Laboratories Approved 60-cycle speed control transformer, for 110-120-volt A.C. circuit. (This set is not listed in the 1942 Lionel catalog.)

- First time at real popular price
- Remote control uncoupling device
- Automatic coupling adds to fun
- Remote control . . . fast or slow . . . stop or start . . . forward or backward . . . just use lever on speed control transformer without touching train. Make your boy a real trainman

Clear the track and "make way" for the fast "New York Central" freight . . . here comes the modern Casey Jones! You always get a lot of electric train value for your money at Sears . . . one of our biggest values.

Fast or slow . . . stop or start . . . forwards or backwards—this train does all these things by remote control (simply work lever on transformer, don't touch train). And you can uncouple one, two or all cars, too, without touching the train. Here's how you do it: stop the train on the special uncoupling section, "start her going" in the direction opposite to which you were going, and the cars you wish to uncouple separate from the engine and tender. To couple cars simply back up engine and tender, it's automatic, too.

Realistic steel steam type locomotive and double-truck, 8-wheeled, colored metal cars, built to correct scale—unbelievably realistic. They include a coal and water-type tender; tank car; box car; log car, with logs; and a caboose. Locomotive has a headlight that shines—it "throws" a real beam of light. 18-section oval track, about 180 inches around. You also get an "Uncouple Here" sign—to set up along the uncoupling track at the point where you'll "uncouple" the cars. Underwriters' Laboratories Approved speed control transformer. For 110-120-volt, 60-cycle A.C. circuit.

Sears Easy Payment Plan

MAKES CHRISTMAS GIVING EASY

ONLY 10% DOWN ON MOST ORDERS

No matter how many items you include in your Easy Payment order—if each item is priced at $6.00 or less, your down payment is just 10% of the cash price plus tax (if any) and postage.

This year it's especially important that you shop and mail early to avoid disappointing anyone. With Sears Easy Payment Plan you can buy now—weeks ahead of Christmas—and budget your payments over several months.

Begin now to list all the items you want on the Easy Payment side of Sears order blank. You will be pleasantly surprised at how many fine gifts your dollars will buy at Sears low prices.

Items priced over $6.00 each require 33⅓% down payment

If your order includes items priced over $6.00 each, figure your down payment on those items at 33% (one-third). The one exception in this Christmas Book is furniture items, priced at more than $6.00 each, which requires a down payment of 20% (one-fifth) with your order.

If your order includes merchandise from more than one group, figure the required down payment for each group separately. Then add the down payments and the total is the amount you send with order.

Amount payable monthly on Easy Payment Orders

Refer the unpaid balance of your order (the cash price less down payment) to the Payment Table at right. At Sears, only $5.00 monthly will buy any amount of merchandise from $10.00 to $50.00.

Do your Christmas shopping right at home

Select gifts for everyone on your list right from this catalog. Shop the easy way . . . save time . . . save money . . . save tires.

PAYMENT TABLE

Shows carrying charge and amount payable monthly based on the unpaid balance (cash price less down payment). Where there is any tax on sales, or prepaid transportation charge, we shall add such items to the unpaid balance before figuring the carrying charge to be added to your order.

Even a NAIL is worth saving!

The need is urgent. 3½ million tons of scrap metal must reach the steel mills every month to keep them at capacity production, turning out steel for implements of war. Industry supplies two-thirds of this. One-third must come from American homes, farms, and offices. There is no other source. Go over your place again. Don't let even the smallest piece of metal escape your vigilance—nails, wire, keys, ash trays, coat hangers, old tools, tire rims, fences that can be torn down. And see to it *yourself* that the scrap you collect reaches a salvage depot. Americans have no more vital war duty.

Send the boys in service a box of Christmas Cheer

Give Christmas back to all the world

No toys this year for the children of Greece and Poland . . . no tinseled trees in Holland . . . no Christmas carols in Norway nor tinkling bells in France. No Christmas happiness and merriment in any conquered country. Only hunger and horror, death and destruction.

But in our country Christmas is Christmas still—a time of gifts and good fellowship, faith and hope under the starry skies of freedom.

To give this Christmas back to all the world—buy War Bonds for implements of war to crush the enemy—to rid the world of the oppressor—to relight the star of Bethlehem over all the earth. Time is short, speed essential. Buy bonds now and keep on buying.

Gift Ties

WITH A STORY TO TELL

Two special groups—one unusual because the ties are made partly of lustrous silk . . . the other because they're woven with Elasti-glass, miracle fabric that smooths out by hand. Any man will like the patterns

95c Each 2 for $1.85

Ties 1 to 6 . . . Astonish him with an Elasti-Glass Tie!

Amazing because they're actually woven of fine rayon and Elasti-glass (Vinylite plastic) to give you a cloth that smooths out by hand, wears longer than many neckwear fabrics. Constructed in the resilient way, with loose stitching down the center that allows the cloth to "give" when you tie it. Interlined with virgin wool, bias cut so it will resist the strain knotting puts on a fabric. Patterns like those shown. Each tie individually boxed.

Paisley patterns—ground colors woven in the twill weave —(1) maroon, (2) brown, (3) blue.

Floral satin figures—(4) brown, (5) maroon, (6) blue.

33 P 8490—State pattern number. Shipping wt., each, 3 oz.

Ties 7 to 13 . . . Bemberg—one of the finest of rayons—combined with silk

Nothing ordinary about these ties—they've got the soft, rich feel of genuine silk, plus the added body you get from mixing it with one of America's most costly rayons. Actually hold a knot better than all-silk ties. Resilient construction gives them a smooth drape . . . virgin wool, bias cut interlinings resist wrinkles. Patterns similar to those shown. Each individually boxed, ready to wrap.

Brocaded satin patterns . . . effect of hand worked designs . . . (7) maroon, (8) green, (9) brown, (10) blue.

Lustrous satin stripes . . . gleaming stripes on rich ground colors . . . (11) maroon, (12) brown, (13) blue.

33 P 8491—State pattern number. Shipping wt, each, 3 oz.
